Conversion of farenhiut temperature to celcius

```c
#include < stdio.h>
#include < conio.h>

int main ()
{
float faren, cel;
clrscr();
printf("Enter the Farenhiut temperature
                              \n");
scanf("%f",&faren);
cel = ((faren - 32.0) × 5.0)/9.0;
printf("The temperature in celcius
              is %f", cel);
getch();
return 0;
}
```
